Coimbatore, Tamil Nadu, India

PROFESSIONAL SUMMARY

Software Engineer Intern with hands-on experience in web application development and full-stack projects. Skilled in Java, C++, JavaScript, React, Node.js, SQL, MongoDB, and REST APIs, with a strong foundation in OOP, DSA, and SDLC. Experienced in building responsive applications, implementing software solutions, working with databases, and applying problem-solving skills to real-world development projects.

EDUCATION

- Sri Krishna Arts and Science College** 2023 – 2026
Bachelor of Science Computer Technology [CGPA: 8.6/10] Coimbatore, Tamil Nadu
- AVB Matric Higher Secondary School** 2021 – 2023
Higher Secondary certificate (HSC) [percentage:86] Coimbatore, Tamil Nadu

WORK EXPERIENCE

- HackupTechnology** May 2025 – June 2025
Mern Security Intern
 - Developed an antivirus assistant using Python for automated file scanning, malicious activity detection, and threat analysis, with integrated database and user interface components.
 - Implemented application logic and security features for file scanning and threat detection, while testing and debugging the system to improve reliability, performance, and detection accuracy.
- G2 TechSoft** Mar 2026 – Present
Software Engineer Intern
 - Developed and maintained web applications using HTML, CSS, jQuery, Bootstrap, SQL, and MongoDB, following practical software development workflows.
 - Collaborated on software development tasks using Git and Jira, gaining hands-on experience with SDLC, project management, debugging, and team-based development practices.

PROJECTS

- AI-Integrated Chat Application** [GitHub]
Tools: React, Node.js, MongoDB, Stream API, Gemini API
 - Developed a real-time chat platform using React, Node.js, and MongoDB, integrating Stream APIs for video calling and scalable communication workflows.
 - Integrated Gemini API to build an AI-powered chatbot, enabling intelligent conversations alongside real-time messaging and video communication features.
- Claimly – Expense Claim Management System** [GitHub]
Tools: JavaScript, HTML, CSS, JSON, Bootstrap
 - Developed an expense claim management system using JavaScript, HTML, CSS, and Bootstrap to streamline claim submission and tracking workflows.
 - Implemented JSON-based data handling and responsive user interfaces, enabling users to efficiently manage, review, and track expense claims.
- VendorFlow – Vendor Management System** [GitHub]
Tools: HTML, CSS, Bootstrap, JavaScript, jQuery, JSON Server
 - Developed a responsive vendor management system using HTML, CSS, Bootstrap, JavaScript, and jQuery for vendor registration, verification, approval, and profile management.
 - Implemented CRUD operations, REST API integration, form validation, and JSON Server data handling for efficient vendor lifecycle management workflows.

SKILLS

- Programming Languages:** JavaScript, Java, C++, SQL
- Frontend:** HTML, CSS, Bootstrap, React
- Backend:** Node.js, REST APIs
- Databases:** SQL, MongoDB
- Tools:** Git
- Concepts:** OOP, SDLC, Data Structures & Algorithms

CERTIFICATIONS

- Oracle Autonomous Database Cloud 2024** – Oracle Academy
- Introduction to Front-End Development** – Meta
- HTML & CSS In-Depth** – Meta
- Fundamentals of Computers** – SWAYAM
- RDBMS** – Spoken Tutorial
